

Dear Investor,

The past week has seen South Africans have to contend with the one-two punch of a new round of loadshedding just as the cold winter weather has set in. Furthermore, municipalities are set to increase energy tariffs by 15% next month. At Decentral, we know that renewable energy solutions are the way forward, and are working harder than ever to provide energy savings and security to our new and existing clients. You can read more about one of our projects, **Viking Business Park**, below.

If you share our vision for a secure clean energy future for South Africa, we invite you to invest in the Decentral Energy Capital Section 12J fund. Remember: **30 June 2021** is the final day that we will be able to accept investment from the retail investor market.

## CREATE JOBS, IMPACT LIVES

An investment in Decentral Energy Capital is not only a wise financial decision. It also reduces carbon emissions and impacts South African lives by creating jobs. Every R1 million invested into Decentral sees more than 112 man-months created and over 3 000 tons of carbon dioxide emissions avoided – equivalent to planting nearly 20 000 trees.

## FEATURED PROJECT

### VIKING BUSINESS PARK

Cape Town, Western Cape

Mixed use

- 500 kWp installed capacity
- 800 000 kWh clean energy generated per year
- 20-year Power Purchase Agreement signed
- 24 960 tons of CO<sub>2</sub> saved over the system lifetime (30 years)

Please reach out to [info@decentral.co.za](mailto:info@decentral.co.za) if you have any questions or would like to secure a spot for this final investment window.

We look forward to a long and prosperous future together,

**Luel Culwick and Christian Bode**

Fund Managers
